FRANCE

3dms

- 3dms produces virtual **3D architectural models**
 - 3dms was created in 2000 by Erwan MINIER.
 - In 2003, we sold the first 3D geographic region viewable on the web
 - roughly 2 years before the first version of Google Earth in France.
 - In 2009, we are now a team of 8 experts, following several years of focus on 3D technology development, we continue to provide innovative 3D services online and offline.
- Our unique **added value** is we combine our **in-depth 3D image expertise** with **real time web** solutions.

3dms

We produce :

- 3D highly photo-realistic computer graphic images
- 3D highly photo-realistic computer graphic movies
- 3D highly photo-realistic real time projects for web

We can bring your images to life in **walk-through, fly-through** animations and **3D real time** scenes for the web.

Our **clients** range from national **property developers** to **architectural firms** and **local authorities**.

Our services are used for both Planning and Marketing purposes and we pride ourselves in being able to provide creative support to your projects at every step of the development process.

3dms

3dms

3D real-time on web

3dms

Our projects going forward:

- To introduce more photo-realistic 3D on the web for e-stores (amazon, ebay ...)
- To propose to a larger public a free application that will allow them to simulate interior displays – home planners...
- To propose an application for virtual professional tradeshow

3dms

Our focus in US :

- To compare the quality of our artwork with the US market
- To look for new real time engines for the web
- To look for new applications for this technology

Thank you.
